

Budgeting and Controlling

Comprehensive roadmap at strategic, tactical and operational level

Why should you attend?

This is a good opportunity to gain an insight into a wide range of elements related to performance management and measurement. Also to determine how the appropriate cost structures should be aligned with the business and corporate level strategies of an entity, and contribute into improvement of the existing system of decision-making in your organization.

What will you gain?

A thorough knowledge and understanding of the interconnection between cost structures, actual profitability of products and services, and the entity's strategies. You will also master the business aspect of transfer pricing and you will advance your understanding of performance management and how it translates into tangible results.

Who is it for?

Practitioners with a basic understanding of cost structures and budgeting, who wish to increase their potential and becoming a key contributor to improved systems of performance.
